Memo

Subject: Construction Inspector Services

MERA construction process relies upon regular inspections to ensure quality and code compliance. AECOM recommends that MERA engage with Elmast Construction and Inspection Services to provide “on-call” inspection services using qualified construction inspectors. This proposal covers 14 sites and adds to the services provided by the “Special Inspection” contract authorized earlier by the MERA Governing Board with Krazaan by bringing special electrical and field inspection expertise to the program.

Elmast inspectors have extensive experience supporting construction and have credentials from the Department of State Architect. This recommendation is for \$ 9200The MERA Executive Officer and/or its designee are hereby authorized to execute any and all documents on behalf of MERA, to effectuate this resolution.

The Elmast proposal is included as an attachment.
