towilliams@marincounty.org

Description	Total
Assistance with drafting and filing three applications per Tracy Simmons of the FCC as a back up option to the waiver request being filed as a result of not constructing FCC call signs WRAR811, WRAR827, WRAS546 within the FCC allowed five year period of time to construct the system licensed under a slow growth extended implementation period. This includes entering the applications into the CAPRAD system; estimated frequency coordination fees using AASHTO and including a 10% administrative fee for The Spectrum Firm to pay on behalf of Marin County; and routine monitoring of filings throughout the frequency coordination and FCC processes. The fees for this work are based on no technical parameter changes to the licenses and a presumption confirmed by David Mortimer who checked with the RPC chair that no contour maps are needed. If there are any changes to these presumptions additional costs will apply. Costs associated with this Project are: Consulting Services Estimated Frequency Coordination Fee	4,750.00 11,240.00
Please indicate your acceptance of this quote for service by signing below and return a copy of this estimate to The Spectrum Firm at the address indicated above.
